

FOR IMMEDIATE RELEASE

TAKEUCHI ADDS TB325R SHORT TAIL-SWING COMPACT EXCAVATOR

Takeuchi Japan: Takeuchi, an innovative global leader in compact equipment, has launched the TB325R Hydraulic Excavator. The newest edition to Takeuchi's 300-Series, this model features numerous upgrades and operator comfort features that now come standard with the new 300-Series excavator line up.

The TB325R lends itself well to confined job sites, boasting a short tail-swing design that decreases the amount of overhang from the counterweight, resulting in improved maneuverability. With an operating weight of 2,440 kg, a reach at ground level of 4,350 mm, a dig depth of 2,540 mm, and a bucket breakout force of 19.3 kN, this machine offers maximum productivity on every job, no matter the size. There are also up to 4 optional auxiliary hydraulic circuits that allow the TB325R to increase utilization as a tool carrier.

New features on the TB325R include a completely redesigned automotive styled interior with intuitive hydraulic pilot controls for precise operation, a 3.5" display panel and a centralized rocker switch bank. These advancements provide the operator with unmatched comfort and visibility in a machine designed for optimum productivity, performance, and reliability.

"Takeuchi is excited to release the TB325R and continue to extend our 300-Series line up," says Toshiya Takeuchi, President of Takeuchi. "We are proud to continue our history of dedication to our customers and to the industry, and the addition of this newest short tail-swing excavator pushes our legacy forward to its next step."

About Takeuchi

Takeuchi is an ISO 9001 certified manufacturer of an extensive line of compact track loaders and compact excavators. Founded in 1963, Takeuchi has led the way in new product development and introduced the world's first compact excavator in 1971. In 1986, Takeuchi developed and launched the first compact rubber track loader that was ideal for the rough terrain operations, another world first. These two products have transformed the global construction equipment market.
